

Contrastive-negative knobs reduce bystander marker leakage; positive-side knobs nudge it up

Mean across 23 held-out bystanders. Error bars = 95% bootstrap CI half-width. Open circle = anchor cell (1 positive persona × 200 examples / 2 negatives × 200 examples). N=1 seed (42). Qwen-2.5-7B-Instruct, contrastive LoRA SFT.
