

Epoch 1 — divergence predicts marker log-prob transfer, mostly via the 3 stylized personas

240 off-diagonal cells (16x16 cross-eval, on-diagonal excluded). DV is teacher-forced log P(marker) at the slot after a base on-policy response R. Color: cells whose source or target is one of the 3 stylized personas (pirate captain, comedian, villain) carry almost all of the off-ceiling dynamic range.

● cells touching no stylized persona (n=156 cells) ● cells touching a stylized persona (pirate captain, comedian, or villain; n=84 cells)
