

#1739 — persona-vector readouts by evaluation setting (P-B)

P-B readout (LODO): one trait-eliciting dataset held out whole; OOD bar is that held-out dataset | MLP-map arm was never run under LODO

■ PV on context
 ▨ PV on mapped answer — MLP map
 △ low DV spread — untrustworthy
■ PV on mapped answer — linear map
 ■ PV on real answer (upper bound)
