

Trigger-conditional contrast: install elevates * MORE without the trigger

If the install were trigger-gated, with-trigger bars would tower over no-trigger.

Instead the no-trigger control sits ~2.5 nats higher at every depth — the elevation is uniform, not gated.

n = 384 per cell pooled across 3 seeds × 128 contexts; 95% bootstrap CI on median; commit 6f3d5584
