

Fixed behavior directions before generation

Generic 963,444-pair linear map · layer 19 · no downstream behavior fit

- Actual answer
- Context direction
- Shuffled pairs (5 fits)
- Mapped answer
- Answer direction on context

Points: Spearman ρ ; intervals: 95% paired group bootstrap. Shuffled point: mean of 5 seed correlations.

Unfiltered instruction contrasts. Map training targets include closing tokens; cached answer vectors exclude them.
