

Does the AMOUNT of training in between predict how badly the context→answer map transfers?

0: direct transfer

Spearman $\rho = +0.96$ (n=9 pairs) · post-trained sources only: $\rho = +0.95$ (n=5)

5: rotation + bias

Spearman $\rho = +0.98$ (n=7 pairs) · post-trained sources only: $\rho = +0.87$ (n=3)
