

The #529 persona-asymmetric default-slot leakage finding persists at lr=5e-6

Teacher-forced marker log-probability under the bare default-assistant encoding. log P = 0 means the marker's teacher-forced next-token probability is 1. Pirate-trained LoRA: role at log P $\approx$ -0.4 to -1.9 (P $\approx$ 0.15 to 0.67), system arms at -3.6 to -8.9. Villain: ordering more mixed, role between -9.7 and -11.2. n = 5 seeds $\times$ 50 questions per point.
