

Same-behavior reruns agree far more than different behaviors

Per-behavior-U1 seed ceilings 0.96-1.00; the two cross pairs (0.58-0.59) sit far below

Bars = per-behavior-U1 cross-seed ceiling (Q2 object). The per-cell ceiling used for the per-context bar is a different object; fact's per-cell median is lower (0.85).
