

Repeat-regime top-1 share sits below the single-visit sibling at matched stack-n in 6/6 reads (controls under-installed — dose-unmatched)

top-1 singular share (fixed-text stack, n=80 rows)

- single-visit sibling, 80-row subsamples (8 draws)
- subsample mean
- single-visit full 1,200-row read
- ◆ repeat-regime control (80 rows × 15 epochs)
