

In-band marker log-prob delta vs sycophancy leakage, per source, at sub-emission anchors (labeled variant)

One point per bystander persona (n = 23 per panel); x error bars are per-cell SE over 50 probes; y error bars are per-bystander sycophancy SE.
Blue = sources whose frozen sycophancy panel actually varies; grey = near-flat sycophancy (descriptive only). Zero of 7,200 generations contain the marker.
