

Where the SAE-space map's error lives (directions = SAE features, k = 4096, normalized squared residual)

k-stable: interaction share 1.00-1.00 across k = 256, 1024, 4096, 16384, 65536, all (directions ranked by holdout target variance)

Share of the map's held-out error
