

# #1739 — behavior predictability by evaluation setting (P-B)

P-B readout (LODO): one trait-eliciting dataset held out whole; OOD bar is that held-out dataset

— Context —    — Mapped answer —    — Real answer (oracle) —  
— persona-vector projection —    — persona-vector projection —    — persona-vector projection —  
— fitted ridge —    — fitted ridge —    △ low DV spread — untrustworthy
