

Head-to-head: five candidate base-model predictors vs post-SFT misalignment (N = 7 pairs)

**Activation similarity
(behavior described in words)**

Spearman $\rho = +0.50$ 95% CI [-0.65, +1.00]

**Activation similarity
(behavior shown via examples)**

Spearman $\rho = +0.75$ 95% CI [-0.12, +1.00]

**Output-distribution similarity
(behavior described in words)**

**predictor returned 0
for all 7 pairs**

(no signal to regress)

**Output-distribution similarity
(behavior shown via examples)**

**predictor returned 0
for all 7 pairs**

(no signal to regress)

In-context misalignment rate

Spearman $\rho = -0.21$ 95% CI [-0.97, +0.86]
