

Persona map transfers across chat / no-template, but not story (context arm, layer 19)

Source framing

Base model

Instruct model

Layer-19 transfer R^2 (colour clipped to [-1, 0.7])

Rows = source framing, cols = target framing; diagonal (boxed) = within-regime R^2 . Colour clipped to [-1, 0.7]; catastrophic story cells saturate but are annotated with their true value. Chat $\leftrightarrow$ no-template retains 83-84% of ceiling (instruct); story transfer is deeply negative. Base story = N/A (not tested).
