

Context-vector patching — before/after generations

✓ Pirate persona transfers through one patched position (all 28 layers) Unpatched — bare (no prefix), query: explain hash tables A hash table is a data structure that implements an associative array abstract data type, a structure that can map keys to values. It uses a hash function to compute an index into an array of buckets or slots, from which the desired value can be found. ### [...]	Patched — context-end state ← [pirate persona ('Captain Marrow'), query: explain hash tables] Arrr, ye be askin' 'bout hash tables! Aye, well, let me tell ye 'bout them. A hash table is a data structure that maps keys to values using a hash function. It's like havin' a treasure map where each spot on the map (the key) leads ye straight [...] F = 0.69
✓ Persona strips at a single layer (L16, α=1) Unpatched — pirate persona ('Captain Marrow'), query: write a story about a lighthouse keeper There once was a lighthouse keeper by the name of Jacks on a lonely stretch o' coast where the gales howl like spirits hauntin' the thereafter. His post stood tall as a mast above the breakers, its light a beacon of hope on a sea filled with danger. [...]	Patched — context-end state ← [party-planning conversation, query: write a story about a lighthouse keeper] In the heart of the stormy isle, where the sea's wrath was ever present and the wind whispered tales of the deep, there stood a solitary lighthouse, its beam piercing the darkness like a pirate's sword through the heart of a foe. Within its walls, a lighthouse keeper [...] F = 0.94
✗ The asked question does NOT transfer through the context vector Unpatched — pirate persona ('Captain Marrow'), query: why is the sky blue? Well, laddie, that be a fine question about th' skies and th' rays of light. You see, when th' sun pour's its light down upon us durin' th' day, ye notice th' waves 'a light spannin' all th' colors of th' rainbow, but our eyes tend to focus [...]	Patched — context-end state ← [pirate persona ('Captain Marrow'), query: explain hash tables] Arrr, matey! The sky be blue 'cause of the way the sun's light scatters off the air and clouds. When the sun rises or sets, its light has ta travel through more of the atmosphere, an' that makes the blue light scatter away, leavin' the reds and oranges [...] F = 0.01
✗ The same maximal patch at prefix-end does nothing Unpatched — pirate persona ('Captain Marrow'), query: why is the sky blue? Well, laddie, that be a fine question about th' skies and th' rays of light. You see, when th' sun pour's its light down upon us durin' th' day, ye notice th' waves 'a light spannin' all th' colors of th' rainbow, but our eyes tend to focus [...]	Patched — prefix-end state ← [party-planning conversation, query: why is the sky blue?] Ahoy there, matey! The sky be blue 'cause of the way the sun's light scatters off the air and tiny bits in the atmosphere. It's like when ye shine a torch through a prism, the light splits into all sorts of colors. But the blue light gets scattered [...] F = 0.26
✓ Patching the question's OWN token states DOES swap the question (α=0.5) Unpatched — pirate persona ('Captain Marrow'), query: why is the sky blue? Well, laddie, that be a fine question about th' skies and th' rays of light. You see, when th' sun pour's its light down upon us durin' th' day, ye notice th' waves 'a light spannin' all th' colors of th' rainbow, but our eyes tend to focus [...]	Patched — query-token states ← [pirate persona ('Captain Marrow'), query: rent or buy a home?] Ah, matey, that's a tricky question, better to be a captain of the high seas than a mere tenant on dry land! Rentin' or rentin'... well, it all depends on yer situation, but I'd say it's best to own yer own piece of the ocean. Rentin' is like [...] F = 1.02
✓ Stated formatting policy transfers (top pair of the one causal family) Unpatched — stated policy: Always format your answers as bullet points. - Voldemort sends a horcrux disguised as a common object that Harry must touch, triggering a curse to transport him to Malfoy Manor. - A deadly dream is conjured in Harry's mind, appearing real enough to lure him into a magical trap set in Voldemort's stronghold. - Harry [...]	Patched — context-end state ← [stated policy: Always answer in flowing paragraph prose, never using lists or bullet points.] In the wizarding world, Voldemort could capture Harry Potter through a combination of dark magic, betrayal, and strategic planning. One method might involve using a cursed object, where a hidden trapdoor in a seemingly innocent item like a pen or a book leads to a hidden compartment containing [...] F = 1.03
