

Full dictionary: which feature properties track per-feature predictability?

113,262 SAE features, full dictionary (BatchTopK k=64, resid_post layer 19) | REAL TARGET — dense context -> SAE answer features, ridge mean pooling, full width (#1482 single-turn). Target and covariates share the SAME corpus: the cross-corpus caveat is RESOLVED.

decile-median trend overlaid; log-count hexbin. R^2 display-clipped at -1 — this hides 2.29% of THIS arm's features; linear-axis panels view-clip x to [0.5, 99.5] pct — display only, statistics unclipped.
