

Behavior monitoring: raw projection vs map+projection vs direct in-corpus probe

Metric: Pearson r (PV rig = within-condition; persona/LMSYS = group-CV / cluster-boot, L14). map+projection = <h(v_C), r_B>, best map n1m_mlp_w32768. raw = <v_C, r_B>. Pending cells: pooled probe run partial (hallucination-L14 complete).
