

The marker-leakage predictor cell does not generalize to fact or sycophancy leakage

At the pre-registered last-prompt × L22 × Gaussian-KL cell (and the L19-L24 ridge mean), both behaviors come back near zero.

#509 / scoring.json. Hatched bars = ridge means across the 18 L19-L24 cells. Sycophancy anchor carries a 5000-rep cluster bootstrap CI; cluster on source.
