

Result 2 (fair protocol): every method trains on ALL the training data — map on generic + eliciting; behaviour readouts on all judged data

All bars are single replicate (draw 0 / seed 0); CI = within-draw paired bootstrap over eval contexts. Missing bar = no scored number at that cell; never a zero. Hallucination right of the dashed divider scores fabrication rate x100, a different construct from the 0-100 trait rubric elsewhere. WildChat ceilings were computed on the full rung; the WildChat column evaluates its held-out 20% split. Sycophancy's corrected OOD rungs are pending (sibling round); its OOD column is the existing aita rung.
